## Project Overview

---

## Operation

**Strategic Focus:**  
The Future of Energy-Saving Power Devices As Generative AI drives up global power consumption, power electronics are more critical than ever.  
This event explores the latest advancements in both next-gen (SiC/GaN) and traditional (Si-MOSFET/IGBT) devices, highlighting their vital role in energy conservation.

**Keywords**  
#power supply design  
#power semiconductor  
#power electronics  
#power module

- Key Audience Challenges**
- want to update the market trends and technical trends, including the adoption status of SiC/GaN power devices
  - started using SiC/GaN, but lack info on reliability and design know-how (driving, noise, and thermal)
  - want to find the best balance of cost and performance to determine the optimal use of Si, SiC, and GaN.

# Application Process

This schedule is a guide only and is subject to change depending on circumstances. The event office will contact you with the confirmed schedule after the event is decided.

If the minimum number of sponsors is not gathered by the First Order Deadline, we reserve the right to cancel the event, change the theme, or reduce the scale without prior notice. We appreciate your understanding in advance.

## | Cancellation Policy

Please note that a cancellation fee will be charged if any of the following conditions apply  
after the Order Form is executed  
after submission of the registration form  
after the event office guidance has started

In such cases, cancellation fees will be as follows;

**41 days or more prior to the event: 50% of the contract fee**  
**within 40 days of the event: 100% of the contract fee**

However, in the event that actual costs (such as venue cancellation fees, instructor assignment cancellation fees, etc.) are incurred in excess of the above cancellation fees, we will charge a cancellation fee that includes those additional costs.

## | Consumption Tax

Consumption tax is charged separately.

## | Streaming Platforms

The venue configuration and delivery platform, including operational systems, are subject to change for certain reasons.

## | Online Streaming Risks

Live streaming always involves risks.  
Please be aware of the risks below and the measures we have taken to prevent them.

### ● Risk 1: Trouble with Internet connection or ISP issues

Both video and audio may drop out.

We will immediately switch to streaming on a backup PC and backup line.

### ● Risk 2: Failure in live streaming platform

By storing a buffer during delivery, it reduces the phenomenon of video and audio interruptions due to the user environment.

The system is redundant so that backup delivery is always available as a countermeasure against failures, but in the unlikely event that the delivery platform fails, an apology for the suspension of delivery will be sent to viewers via e-mail, and they will be guided to the on-demand version at a later date.

### ● Risk 3: Power failure

Both video and audio may drop out. We will announce an apology for the suspension of the streaming from the backup PC and will provide an on-demand version at a later date.

### ● Risk 4: Equipment failure

Both video and audio may drop out. We will immediately switch to streaming on a backup PC and backup line.

### ● Risk 5: Viewer-side connectivity issues

If fewer than 10% of total viewers report viewing failures, the issue is likely caused by the viewer's individual environment and will be handled on a case-by-case basis. If 10 or more similar viewing failures are reported from the total audience, we will announce an apology for the streaming suspension and provide an on-demand version at a later date.
